

State of the Coffee Smallholder Platform: Indicator Report

16 June 2021

Report Characteristics	
Country	Guatemala
Years	2013, 2016, 2012, 2019 - 2020, 2015, 2014 - 2015
Source Type	Academic, Not available, NGO, Coffee Trader
Purpose	Assessment, Evaluation, Impact Study, Baseline, Research
Gender	No disaggregation, Female, Male member household, Female member household, Male, Female head of household, Female likely not head of household
Scope	Not nationally representative

Contents

2.1.3.1 Area under coffee	7
2.1.1.1 Total land area	10
4.6.1.3 Number of sources of income (including coffee)	13
2.3.1.8 Percentage of all food consumed produced on farm	16
4.5.1.2 Access to credit from cooperative	18
4.5.1.3 Access to credit from a bank	20
3.1.1.5 Experienced food scarcity (thin months)	22
3.1.1.4 Months of food scarcity (thin months)	24
4.8.1.1 Able to invest sufficiently on coffee (perception)	27
4.4.4.3 Mean Gross Income from Coffee	29
1.1.1.1 Number of household members	31
1.1.1.2 Number of adults in the household (above 17 yrs)	34

2.1.4.1 Number of plots on the farm (all)	36
4.4.4.2 Percentage of income from coffee	38
3.1.1.1 Household Dietary Diversity Score (HDDS), 24 Hour Recall	40
3.1.1.2 Household Dietary Diversity Score (HDDS), 7 Day Recall	42
3.1.1.3 Months of Adequate Household Food Provisioning	44
4.4.2.1 Net Daily Income (NDI)	46
3.4.2.1 Poverty line per family	48
4.6.1.1 Income sources as percentage of total income: coffee	50
4.4.1.6 Net Economic Income (NDI)	52
4.4.1.4 Net Financial Income	54
4.4.1.3 Gross Financial Income	56
4.3.1.5 Financial cost of production	58
2.1.5.9 Land under production (non coffee)	60
2.1.5.2 Land uncultivated	63
4.4.1.1 Total gross income from all sources	66
4.6.1.7 Other farm sales (% of income)	69
4.6.1.8 Employment (% of income)	71
4.6.1.9 Other, e.g., remittances (% of income)	73
3.4.2.2 Likelihood of living below 2.50 USD per day	75
4.4.2.2 Estimated income per day	77
4.4.4.6 Farmer's coffee revenue (year)	80
1.1.3.1 At least one family member away	83
3.2.1.2 Receiving training	85
5.2.2.2 Coffee trees per ha	87

Note; If values have been converted to standard units, original values and conversion rates will be available in the indicator excel download.

4.1.2.1 Coffee yield (kg/ha)	90
3.5.1.2 Women as a percentage of producer organisation members	93
5.5.2.12 Recycling of coffee waste	95
5.1.1.3 Use of organic fertilizers	97
5.1.1.2 Use of synthetic fertilizers	99
5.5.2.27 Use of live barriers in coffee	101
5.5.2.34 Use of soil ridges	103
5.5.2.6 Presence of terraces in coffee plots	105
5.5.2.21 Treatment of coffee wastewater	107
5.5.2.20 Treatment of household wastewater	109
5.5.2.11 Proper washing of agrochemical equipment	111
5.5.2.13 Maintenance of on-farm forest cover	113
2.1.5.8 Average land dedicated to natural forest (% total ha)	115
2.1.5.7 Average land dedicated to comercial monoculture (% total ha)	117
2.1.5.6 Average land dedicated to 4-10 species agroforestry (% total ha)	119
2.1.5.5 Average land dedicated to 2-3 species agroforestry (% total ha)	121
2.1.5.3 Average land dedicated to cleared land or pasture (% total ha)	123
2.1.5.4 Average land dedicated to multi-strata forest with crops (% total ha)	125
4.4.1.2 Total household income	127
1.2.2.3 Average years of schooling	130
1.2.4.1 Rate of illiteracy	133
2.1.3.2 Proportion of farm area in coffee	135
5.2.3.4 Number of coffee varieties	137
5.2.2.3 Coffee trees total	140

Note; If values have been converted to standard units, original values and conversion rates will be available in the indicator excel download.

4.1.2.3 Coffee yield (kg/ha, parchment)	142
2.4.1.1 Harvests only mature cherries	144
5.1.3.1 Number of times fertilizers applied per year	146
4.4.3.1 Number of net minimum incomes per month the family makes	148
4.5.1.4 Had access to credit	150
1.3.2.2 Number of family members working either on-farm or off-farm	152
3.4.3.1 Supply of safe drinking water for the family and workers	154
5.5.2.19 Use of practices to protect water sources (e.g., plant trees, not apply fertilizers close to water sources)	156
5.2.2.6 Shade trees on farm (not only coffee plots)	158
5.5.2.28 Use of live barriers around the coffee plot(s), house, trails etc.	160
5.5.2.9 Composts coffee pulp	162
5.5.2.5 Contour planting	164
5.5.2.30 Use of barriers (live, dead, physical) for soil management	166
5.5.2.8 Plants nitrogen fixing plants	168
5.5.2.7 Prioritize cultural and biological control of pests and diseases over chemical control	170
2.4.2.1 Has infrastructure for drying of coffee	172
5.5.2.16 Weeding of the tree basin	174
5.5.2.15 Use of weed targeting equipment for application of herbicides (selector de arvenses)	176
5.1.1.5 Targeted use of herbicide and/or use of herbicides once a year	178
5.5.2.14 Clearing between rows	180
5.5.2.33 Use of cover crops or mulch	182
3.5.1.1 Member of a producer organisation	184
1.2.3.8 Head of household highest level of education: primary school	186

Note; If values have been converted to standard units, original values and conversion rates will be available in the indicator excel download.

1.2.3.9 Head of household highest level of education: secondary school	188
2.1.1.2 Total land area (owned)	190
2.1.5.1 Land cultivated	192
5.1.2.2 Nitrogen fertilizer used by the household kg	194
1.1.1.4 Number of household members aged 3 or under	196
1.1.1.7 Number of household members of more than 50 years of age	198
2.3.2.3 Percentage with home garden	201
2.3.1.3 Grow beans	203
2.3.1.2 Grow maize	205
2.3.1.4 Grow plantain	207
5.5.2.10 Intercropping	209
1.3.1.2 Farmer years of experience	211
1.2.3.4 Farmer highest level of education: completed primary school	214
1.2.3.5 Farmer highest level of education: completed secondary school	216
1.2.3.6 Farmer highest level of education: completed technical education (post secondary school)	218
1.2.3.7 Farmer highest level of education: completed university	220
3.2.1.1 Participated in training events during the last two years	222
3.2.2.1 Received technical advice from extension agents during last two years	224
2.1.2.1 Land tenure: owns land	226
2.2.1.1 Distance from house to the farm	228
2.2.1.2 Presence of stream or river on the farm	231
2.1.3.6 Mean size of coffee plots	233
2.3.1.9 Mean size of maize plots	236

Note; If values have been converted to standard units, original values and conversion rates will be available in the indicator excel download.

5.3.2.1 Perceives climate change to be happening	239
5.2.2.1 Mean tree density in coffee plots per ha	241
5.2.1.1 Mean tree species richness in coffee plots	244
5.2.2.5 Mean tree diameter at breast height of trees in coffee plots	247
5.2.1.2 Average Shannon Diversity Index of trees in coffee	250
2.3.2.2 Area under home garden	253
5.5.1.3 Area under Ecosystem-based Adaptation (EbA) practices	256
5.5.1.2 Number of Ecosystem-based Adaptation (EbA) practices on the farm	259
5.5.2.32 Presence of cover crops in coffee plots	262
2.3.2.4 Number of land uses (including coffee)	264
5.1.1.1 Use of fertilizers	267
5.1.1.4 Use of mix of organic and synthetic fertilizers	269
5.2.1.3 Number of fruit tree species on farm	271
2.1.3.3 Area of land dedicated to coffee increased in the last ten years	274
2.1.3.4 Area of land dedicated to coffee decreased in the last ten years	276
5.2.3.1 Planted new coffee varieties in the last ten years	278
5.2.3.2 Planted new coffee varieties in the last 10 years to renovate the plantation with coffee rust resistant varieties	280
5.2.3.3 Planted new coffee varieties in the last 10 years for protection from extreme weather events (rains/droughts)	282
2.3.1.11 Mean size of basic grain (maize and beans) plots	284

Note; If values have been converted to standard units, original values and conversion rates will be available in the indicator excel download.

2.1.3.1 Area under coffee
